#### Description:

**Review** "I thought this book was VERY good, loved it! I really didn't want to ever put it down!"  
From Smashwords

From the moment I began reading this book I was hooked. The writer was extremely skilled at giving *just* enough away while still keeping you in the dark and wishing you could figure it out. It was exciting, suspenseful, and generally great.

**From the Author** I started writing Birthright because I was bored half insane and I've always had an overactive imagination that will go off on the most silly little tangents about anything at all really so it seemed only natural that when I found myself so completely and helplessly at loose ends one winter day that I began to write. Before then I had felt for many a year that I had what I could only describe as a completely useless talent for words though when I opened myself up to the story for the first time it spawned in me an enduring love affair with the written word which has profoundly changed my life. I can now spot a typo from across the room and I fairly consistently offer to rewrite anything that doesn't have the exact wording that I believe it should and I probably drive my husband completely batty but what can I say, it's compulsive. But I digress.

I had wondered at the possibility for years that something man made and frequently used could alter our very existence. I wondered if it could theoretically happen and what the circumstances surrounding an oversight of this magnitude would have to be and I became so enamored of the idea that I eventually began to become more obsessive than anything. When it came to the point that I could no longer put up with myself I finally set about writing a story that embodied the more dramatic aspects of my creative imagination gone hopelessly awry the result of which was Birthright. I've been sitting on Birthright for about eight years and have just discovered the courage thanks to the undying support and strength of the love of my life to actually post my writing though now I leave it to you, the reader, to judge the worth of my work.
