Description:

Modern organizations rely on Security Operations Center (SOC) teams to vigilantly watch security

systems, rapidly detect breaches, and respond quickly and effectively. To succeed in these crucial tasks, SOCs desperately need more qualified cybersecurity professionals. Cisco's new CCNA Cyber Ops certification prepares candidates to begin a career working with associate-level cybersecurity analysts within SOCs. To earn this valuable certification, candidates must pass two exams.

Designed for all CCNA Cyber Ops candidates, it covers every objective concisely and logically, with extensive teaching features designed to promote retention and understanding.
