Description:

From As food self-sufficiency awareness grows, books appear to support such efforts. Hess is unique in her recognition of the practicality of weekend-only attention to these pursuits. A 12-month structure helps a variety of readers, from multiacre farm dwellers to suburbanites and high-rise residents, start with short projects. Springtime planning includes acreage, backyard and urban container plantings, rooftop and community gardens via mapping, record-keeping, and planting tips

(okra, squash). Hess segues to summer and fall plantings (leaf lettuce, turnips, carrots), advising on seed and food preservation and season-extension using hoop-supported protection. Colder weather means planning crop rotation, soil testing, and planting fruit trees and berries, and March allows the planting of cold-tolerant veggies (beets, onions). Hess provides a list of goals, costs, times, levels of difficulty, and kid-friendliness for each project, and illustrations, photos, charts, and diagrams throughout. --Whitney Scott
